BRIXWORTH RURAL
DISTRICT COUNCIL

ANNUAL
REPORT

OF THE

MEDICAL OFFICER
OF HEALTH

FOR THE

YEAR 1956

---000---

JOAN M. ST. V. DAWKINS
M.B., B.S., D.P.H., D.C.H.

BRIXWORTH RURAL
DISTRICT COUNCIL

ANNUAL REPORT

OF THE

MEDICAL OFFICER
OF HEALTH

FOR THE

YEAR 1956

— 000 —

JOAN M. ST. V. DAWKINS
M.B., B.S., D.P.H., D.C.H.

TO THE CHAIRMAN AND MEMBERS OF
THE BRIXWORTH RURAL DISTRICT COUNCIL.

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present the Annual Report of the Medical Officer of Health for the Brixworth Rural District for the year 1956, incorporating that of the Senior Public Health Inspector.

As Dr. H.A.H. Summers was your Medical Officer of Health throughout 1956, I present this report on his behalf.

The vital statistics for the year show a slight fall in the number of live births, the illegitimate rate remaining about the same. The infant death rate rose to 23.08, being only just below the national figure of 23.8. The death rate fell to 11.82 compared with 14.2 last year. The causes of death remained substantially the same as last year. The commonest cause of death being heart and diseases of the circulatory system, followed by cancer and next cerebral vascular lesions.

Infectious disease notifications totalled 66, showing a fall of 116; this is due to the decline in notifications of measles which were 133 in 1955 and in 1956, only 27. Other diseases notified were Food Poisoning 16, which showed a marked increase because of a localised epidemic in the Harlestone - Brampton area. There were 10 cases of scarlet fever. Dysentery showed a decline from 23 in 1955 to 3 in 1956. No poliomyelitis occurred.

Vaccination against poliomyelitis was started and in all 103 children were vaccinated. This was the beginning of a new and important immunisation campaign which this year was offered only to a limited number of children, but will be greatly extended in ensuing years.

Sewage schemes can be reported as having made excellent progress. Maidwell and Draughton were completed and work at Church Brampton and Harlestone, Clipston, Great Oxendon, Moulton (Village), Pitsford and Sibbertoft proceeded satisfactorily.

Housing development continued in a satisfactory manner. Altogether 52 houses were completed by the Council (2 less than in 1955) making the total built since the war 616. A further 38 were under construction at the end of the year. Private enterprise produced 128 houses (39 more than in 1955) making the total since the war 572. A further 80 houses were being erected at the end of 1956. Improvement grants were made on 55 properties compared with 67 in 1955.

In conclusion, thanks are expressed to all the members of the Staff who contributed in any way towards the compilation of this report, in particular, to those of the Public Health Department, also the Chairmen and Members of the Public Health and Housing Committees for their interest and encouragement during the year under review. Appreciation is also expressed for the information on immunological measures supplied by the County Medical Officer of Health.

I have the honour to be,

Your obedient Servant,

JOAN M. ST. V. DAWKINS.

Medical Officer of Health.

July, 1957.

TABULATED SUMMARY FOR PREVIOUS YEARS

Year	Estimated Population	<u>Births</u>		<u>Deaths</u>			
		No.	Crude Rate	<u>Under 1 year</u>		<u>All Ages</u>	
				No.	Rate	No.	Crude Rate
1947	15740	338	21.47	10	29.58	211	13.46
1948	18020	262	14.54	6	22.90	212	11.76
1949	17170	259	15.08	8	31.00	203	11.82
1950	17240	265	15.37	5	19.00	201	11.66
1951	17730	291	16.41	9	30.93	191	10.72
1952	17840	263	14.78	6	22.81	156	8.74
1953	17990	267	14.88	11	41.19	235	13.06
1954	18300	266	14.51	4	15.03	257	14.04
1955	18440	276	14.96	5	18.11	270	14.64
1956	18620	260	13.96	6	23.08	220	11.82

SECTION A.

NATURAL AND SOCIAL CONDITIONS.

AREA - (82,944 acres). This District continues to be mainly agricultural in character. Open cast workings for ironstone continues in the vicinity of Brixworth and Pitsford. The large reservoir at Pitsford which had been under construction for the last few years was finally completed and opened by the Queen Mother in October 1956.

POPULATION. The Registrar General estimated the population for the mid-year 1956 to be 18,620, an increase of 180 over the previous year. The natural increase in population, the excess of births over deaths, was 40.

DEATHS. The total number of deaths assigned to the District for the year was 220 compared with 270 in 1955. The crude death rate based on the mid-year population was 11.82 compared with 14.64 in the previous year. The following table has been compiled for comparison with the four previous years :-

<u>Years</u>	<u>Total</u>	<u>Male</u>	<u>Female</u>	<u>Recorded Rate</u>
1952	160	78	82	8.74
1953	235	97	138	13.06
1954	257	93	164	14.04
1955	270	105	165	14.64
1956	220	104	116	11.82

In order to compare the mortality in the District with the mortality for England and Wales it is necessary to make a correction, to allow for the difference in age and sex distribution of the two populations. This is done by applying to the crude death rate

of the District an "Area Comparability Factor" which has been estimated by the Registrar General as 0.66 for this District.

The Standardised Death Rate, therefore, is 7.80 and well below the figure of 11.7 for England and Wales.

M O R T A L I T Y T A B L E

Based on the Abbreviated List of the International Statistical Classifications of Diseases, Injuries and Causes of Death, 1948.

	<u>Causes of Death</u>	<u>Male</u>	<u>Female</u>	<u>Total</u>
1.	Tuberculosis, respiratory	1	-	1
2.	Tuberculosis, other forms	-	-	-
3.	Malignant neoplasm, stomach	6	5	11
4.	Malignant neoplasm, lung, bronchus	6	-	6
5.	Malignant neoplasm, breast	-	5	5
6.	Malignant neoplasm, uterus	-	1	1
7.	Other malignant and Lymphatic neoplasms	8	11	19
8.	Leukaemia, aleukaemia	-	-	-
9.	Diabetes	-	-	-
10.	Vascular lesions of nervous system	14	14	28
11.	Coronary disease, angina	11	7	18
12.	Hypertension with heart disease	2	2	4

<u>Causes of Death</u>		<u>Male</u>	<u>Female</u>	<u>Total</u>
13.	Other heart disease	19	48	67
14.	Other circulatory disease	10	5	15

19.	Other respiratory diseases	-	-	-
20.	Ulcer of stomach and duodenum	1	-	1
21.	Gastro-enteritis and diarrhoea	1	1	2
22.	Nephritis and nephrosis	1	2	3
23.	Hyperplasia of prostate	2	-	2
24.	Congenital malformations	3	-	3
25.	Other defined and ill- defined diseases	6	7	13
26.	Motor vehicle accidents	2	1	3
27.	All other accidents	4	4	8
28.	Suicide	<u>1</u>	<u>-</u>	<u>1</u>
Totals		<u>104</u>	<u>116</u>	<u>220</u>

Associated Mortality Statistics:-

STILL BIRTHS	1	4	5
DEATHS of infants under 1 year	4	2	6
DEATHS of infants under 4 weeks (included in previous figure)	3	2	5

BIRTHS. The number of live births assigned to this district was 260, compared with 276 in 1955. The rate per thousand of the population was 13.96. Applying the

Registrar General's Area Comparability Factor for births (1.04) to this figure the Standardised Birth Rate obtained for this district - 14.52 - compares satisfactorily with 15.6 for England and Wales.

STILL BIRTHS. The number of still births during 1956 was 5 (1 male and 4 females). The resultant rate for the district is 19.23 which is less than that for England and Wales. The rates for the past five years are given in the following table (per 1,000 live and still births) by way of comparison.

STILL BIRTH RATE.

<u>1952</u>	<u>1953</u>	<u>1954</u>	<u>1955</u>	<u>1956</u>
11.27	32.61	22.07	28.16	19.23

ILLEGITIMATE BIRTHS. There were 13 illegitimate births assigned to the district during the year (4 males and 9 females), compared with 14 in 1955. Shown as a proportion of the total number of live births this represents 5.00 per cent.

MATERNAL MORTALITY. No deaths associated with pregnancy or childbirth were recorded during the year.

INFANT MORTALITY. The number of infants who died before reaching their first birthday was 6 (4 males and 2 females), compared with 5 in 1955. The resultant rate of 23.08 compares favourably with 23.8 for England and Wales.

DEATH RATE UNDER 1 YEAR PER 1,000 LIVE BIRTHS

<u>1951</u>	<u>1952</u>	<u>1953</u>	<u>1954</u>	<u>1955</u>	<u>1956</u>
31	22.81	41.19	15.03	18.11	23.07

NEONATAL DEATH RATE. The number of infants who failed to survive for 4 weeks after birth was 5, (3 males and 2 females). This gives a rate per 1,000 live births of 19.23 or 1.92 per cent.

These deaths are included in the Infant Mortality Rate.

SECTION B.

GENERAL PROVISION OF HEALTH SERVICES

LABORATORY SERVICE. Laboratory work in connection with the diagnosis and control of infectious diseases is carried out at the Emergency Public Health Laboratory in Northampton under Dr. Hoyle.

INFANT WELFARE CENTRES. The following centres are held at the places and dates indicated. Your Medical Officer of Health is in attendance in her capacity as Assistant County Medical Officer.

BRIXWORTH INFANT WELFARE -

3rd Friday each month at Village Hall.

WELFORD INFANT WELFARE -

4th Thursday each month at Village Hall.

BOUGHTON INFANT WELFARE -

2nd Wednesday each month at Boughton Institute.

MOULTON INFANT WELFARE -

1st Tuesday each month at Manfield Hall.

SPRATTON INFANT WELFARE -

4th Tuesday each month at Women's Institute.

AMBULANCE SERVICES. General medical and surgical cases are removed by the St. John Ambulance Brigade from Northampton, the Brigade acting as agents of the County Council under the arrangements made under Section 27 of the National Health Service Act, 1946. Infectious disease cases are also removed by the St. John Ambulance Brigade under the same arrangements.

NURSING IN THE HOME. The County Council became responsible for these duties as from 5th July, 1948.

ISOLATION HOSPITAL. Cases of Infectious Disease which require Isolation are treated at the Harborough Road Isolation Hospital, Northampton, which comes under the administration of the Oxford Regional Hospital Board.

SECTION C.

SANITARY CIRCUMSTANCES OF THE DISTRICT

WATER SUPPLIES.

All responsibility for water undertaking throughout the entire Rural District is now vested in the Mid-Northants Water Board. No evidence of unsatisfactory water supplies came to notice during 1956.

SEWERAGE AND SEWAGE DISPOSAL.

Satisfactory progress was maintained. During the year a scheme for Maidwell and Draughton was

completed. Work was still proceeding at Church Brampton and Harlestone, Clipston, Great Oxendon, Moulton (Village), Pitsford and Sibbertoft.

Further schemes were approved by the Minister for the following parishes, viz: Lamport and Hanging Houghton, Ravensthorpe and Spratton.

DISINFECTION. Concurrent and terminal disinfection by means of gaseous and liquid disinfectants is carried out in homes where certain infectious diseases are notified. In the course of the year, a number of requests for disinfection of premises were received and dealt with.

DISINFESTATION. This service is carried out on behalf of the Council at the request of owners or tenants of houses complaining of the presence of vermin. No such action was necessary during 1956. (This includes the eradication of bed bugs).

PREVENTION OF DAMAGE BY PESTS ACT, 1949.

During the year the existing staff proved adequate to discharge the Council's responsibilities under the Act; no major rat infestations occurred on the Council's properties throughout the period under review. Refuse tips are treated regularly throughout the year.

MOVEABLE DWELLINGS. Five licences were granted by the Council under the Public Health Act, 1936, Sec.269.

SCAVENGING. Refuse is still collected fortnightly throughout the District.

NATIONAL ASSISTANCE ACT, 1948.

Three certificates under Section 47 of this Act were submitted to the Council by the Medical Officer of Health during the year. One elderly gentleman was permanently removed from his home at Moulton, while an elderly couple (man and wife) from the same village were removed to Danetree Hospital and later returned home, their cottage having been cleaned and redecorated by members of the County Welfare Department and Toc. H.

SECTION D.

H O U S I N G.

Housing Repairs and Rents Act 1954, Sec.I.

No. of permanent dwellings in area	5998
Estimated No. of houses unfit for human habitation according to Sec.9. of the Act and suitable for action under Secs. 11 & 25 of the Housing Act, 1936, et seq.	490
Period of years for demolition of such ..	4
No. of houses for inclusion in Clearance Areas ...	289
" " " already covered by Clearance Orders ..	22
" " " for individual demolition..	179

It is of interest to note that, for the purposes of the report, the total number of unfit houses ascertained to be in existence in the district was 910, but by the time the report had been prepared 224 of these had been sufficiently improved to merit upgrading, whilst a further 196 had been demolished.

The usual work of the Council under the Housing and Public Health Acts continued, and the following details, set out in tabular form, summarise the year's work :-

Housing Act, 1936, Section 11.

1. No. of unfit houses represented	4
2. No. of Demolition Orders made	4
3. No. of houses demolished	7
4. No. of persons affected	18

Housing Act, 1936, Section 25.

1. No. of Clearance Orders made	2
2. No. of houses included in Area	7
3. No. of houses demolished	-
4. No. of persons affected	18

Other associated housing statistics.

1. No. of voluntary undertakings received ..	18
2. No. of unfit houses upgraded	6

From these details it will be observed that the total number of unfit houses throughout the district declined by 6 during the year, either through improvements or demolition whilst a further 18 came under control by means of voluntary undertakings from the respective owners not to re-let after vacation until made fit for human habitation.

SECTION E.

INSPECTION AND SUPERVISION OF FOOD.

MILK. As a result of the transfer in 1949 of the control of milk production on the farm to the Ministry of Agriculture and Fisheries and the placing of the licensing and supervision of pasteurising plants in the hands of the

County Council, the District Council retains only the duty of controlling the distribution and sale of milk.

FOOD AND DRUGS ACT, 1938. - CLEAN FOOD.

DAIRIES. There are two registered dairies in the District, and during the year a satisfactory standard of cleanliness was maintained therein.

FOOD PREMISES. There are 86 food premises in the District, the total number being made up as follows :- 65 shops, 2 cafes, 13 butchers and 6 bakeries.

CONDEMNED FOOD. Condemned food is disposed of in one of two ways, i.e. tinned food is buried at one of the Council's refuse tips, and unsound meat is sent to The Pytchley Hunt Kennels.

ICE CREAM. At the present time all licences for the sale of ice cream limit the trader to pre-packed varieties only. In view of the requirements of the Food Hygiene Regulations 1955, it may in future be possible to allow the sale of partly wrapped products.

FOOD HYGIENE REGULATIONS, 1955. The requirements of these Regulations were brought to the notice of all food traders within the District, and 93 visits were paid to their premises. In some cases there were obvious difficulties to be overcome, but by the end of the year considerable progress had been made and the majority of shops were equipped with hot and cold water, sinks and wash-hand basins. It has been gratifying to find that the majority of traders have been most co-operative, and it is felt that in the very near future the standards prescribed in the new regulations will have very largely been fulfilled.

MEAT INSPECTION.

During the year the number of licenced Slaughterhouses in the District increased to 10, of which 9 were actually in use. Inspection of meat was maintained at 100%, and the findings are recorded below in a table based on that suggested by the Ministry of Health.

Carcases and Offal inspected and condemned in whole or in part

	Cattle	Calves	Sheep & Lambs	Pigs
Number killed (if known)	207	5	2108	304
Number inspected	207	5	2108	304
<u>All diseases except Tuberculosis & Cysticerci</u>	Nil	Nil	Nil	Nil
<u>Whole carcases condemned</u>				
Carcases of which some part or organ was condemned	52	Nil	44	15

	Cattle	Calves	Sheep & Lambs	Pigs
Percentage of the number inspected affected with disease other than tuberculosis and cysticercosis	25.12	Nil	2.09	4.93
<u>Tuberculosis only:</u> Whole carcasses condemned	Nil	Nil	Nil	Nil
Carcasses of which some part or organ was condemned	3	Nil	Nil	3
Percentage of the number inspected affected with tuberculosis	1.45	Nil	Nil	0.99
<u>Cysticercosis</u> Carcasses of which some part or organ was condemned	Nil	Nil	Nil	Nil
Carcasses submitted to treatment by refrigeration	Nil	Nil	Nil	Nil
Generalised and totally condemned	Nil	Nil	Nil	Nil

SECTION F.

PREVALENCE OF, AND CONTROL OVER,
INFECTIOUS AND OTHER DISEASES.

Notification of the following cases of infectious disease was received during the year.

DISEASE	M.	F.	Total	Rate per 1,000 population
Acute Primary Pneumonia	3	2	5	0.27
Measles	13	14	27	1.45
Scarlet Fever	3	7	10	0.54
Food Poisoning	6	10	16	0.86
Whooping Cough	2	2	4	0.21
Paratyphoid	-	1	1	0.05
Dysentery	-	3	3	0.16
Total	27	39	66	

SMALLPOX.

Once again no cases were notified during the year.

NUMBER OF CHILDREN VACCINATED IN 1956.

	<u>Under 1</u> <u>year</u>	<u>1</u>	<u>2-4</u>	<u>5-14</u>	<u>15 or</u> <u>over</u>	<u>Total</u>
Primary	113	6	5	1	7	132
Re-vaccination	-	-	1	13	36	50

SCARLET FEVER. Ten cases were reported during the year, compared with 7 in 1955, the infection again being of a mild type generally. Terminal disinfection was carried out where required.

DIPHTHERIA. No cases occurred during the year.

DIPHTHERIA IMMUNISATIONS 1956.

<u>Under 1</u> <u>year</u>	<u>1-4</u>	<u>5-9</u>	<u>10-14</u>	<u>Total</u>	<u>Booster</u>
1	2	4	-	7	63

WHOOPING COUGH IMMUNISATIONS 1956.

<u>Under 1</u> <u>year</u>	<u>1-4</u>	<u>5-14</u>	<u>Total</u>
-	2	-	2

COMBINED WHOOPING COUGH - DIPHTHERIA
IMMUNISATIONS 1956.

Under 1 year	1-4	5-14	Total
155	66	8	229

NUMBER OF CHILDREN HAVING COMPLETED
A FULL COURSE OF IMMUNISATIONS AT
ANY TIME UP TO 31st December, 1956.

Age at 31.12.56.	under 1 (born 1956)	1 & under	2 & under	3 & under	4 & under	5-9	10- 14	Total under 15
Number	26	189	297	209	210	1117	999	3107

Immunisation is carried out at all Infant Welfare Centres in the District, and also at sessions of school medical inspection when required.

Application for immunisation can be made to the County Council Health Visitor or arrangements can be made with general medical practitioners under the National Health Service Act, 1946.

MEASLES. 27 cases only were reported during the year, compared with 133 in 1955. The infection was again not unduly severe and no deaths resulted from it.

WHOOPING COUGH. 4 cases were notified compared with 10 in 1955. There were no deaths. In view of the serious effects which can result from this infectious disease, parents of very young children are strongly urged to have them immunised against it, preferably at the same time as they are immunised against diphtheria.

ACUTE POLIOMYELITIS. No cases were notified during the year.

IMMUNISATION AGAINST POLIOMYELITIS.

Immunisation against poliomyelitis was commenced for the first time and 103 children were vaccinated.

Under 1 year	1.	2.	3.	4.	5 - 9	Total
-	-	10	13	15	65	103

TUBERCULOSIS.
